QUALITY PERFORMANCE PRECISION

SATISFACTION GUARANTEED

Limited Warranty

All items in the Royce//Ayr catalogue, unless otherwise noted, are warranted for 90 days against defects in workmanship and materials. Normal wear and tear or use of a tool for other than the intended purpose is not covered by this warranty. Merchandise may be returned to Royce//Ayr Cutting Tools for repair or replacement at our option. Royce//Ayr liability is limited to repair or replacement of the merchandise. In no event shall Royce//Ayr be liable for any incidental or consequential damages.

Special Items

Special items are those not in the Royce//Ayr catalogue and are special ordered for the customer. These items are covered by our limited warranty. If a special item is defective, it is covered like any other catalogue item.

Custom Items

Custom items are those that are made to our customer's specifications and are not normally carried by Royce//Ayr or the manufacturer. The customer is responsible to make sure his specifications meet his needs. These items cannot be returned unless there is a defect in workmanship or materials.

No Sale is Final

If you have a problem with an order you placed with Royce//Ayr, please call. We want you to be satisfied with our products and service.

CARBON STEEL SCREW SHANK DOWEL DRILLS (F203)

These drills feature outlining spurs and brad point. They are the most commonly used drills for dowel hole boring. Made of the finest carbon tool steel. Heat treated, precision ground to exacting standards.

Overall lengths are held to very close tolerances in both left and right hand tools to ensure uniform drilling in multiple boring operations. Round shoulder has pinhole for easy removal from machines.

Standard Specifications: All Shanks 7/16" - 14 Thread.

Note: Some sizes available in left hand.

3/8" and 7/16" Dia's are available in 2" twist length x 3-1/2" overall length.

Available while quantities last.

SUPER WEAR STEEL SCREW SHANK DOWEL DRILLS (FX203)

Designed exactly like the F203 except made of Super Wear Steel. This steel requires a minimum of sharpening to maintain maximum production.

The threaded shank is relatively soft to insure against breakage.

VIX BITS (F137)

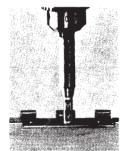

For accurately centering drilling holes for Hinges, Striker Plates, Door Butts, Window Pulls and all hardware using screws.

F137 Vix Bit

Part #	Size	Description
F13774	7/64" #5, 6	Carbon-Steel, 1/4" shank
F13794	9/64" #8, 9, 10	Carbon-Steel, 1/4" shank

Fast, Easy and Simple

Self-centering springloaded guide retracts as you drill.

Makes pilot holes fast, easy, and accurate.

Replacement Drills: F13774CD 7/64" F1374CD 9/64"

CARBON STEEL MULTI SPUR COUNTERBORES (F120)

An adjustable counterbore cutter designed to fit any drill or bit 1/2" diameter or larger with 1/2" diameter shank. Cutter is held firmly in place with set screw on 1/2" diameter shank.

CUSTOM COUNTERSINK (F117)

Sizes made to order

Designed for applications where adjustable-type cutters are not suitable. Drills and countersinks screw hole in one operation.

Taper head drill lead. 82 degree beveled countersink.

CUSTOM COUNTERBORE (F118)

Sizes made to order

Made with machine-drill type counterbore and lead for boring flat-bottomed holes for screws, lag screws, stove bolts, and other fasteners that are countersunk and covered with a plug.

Drills have brad point lead, with two outlining spurs both on the lead and the counterbore. Produces smooth holes on both diameters.

HIGH SPEED STEEL BRAD POINT CENTER DRILL (FX122-BEDLOCK)

Popular for cross-grain boring and other general work requiring smooth, accurate holes. Head twist and shank are ground after hardening.

Part #	Twist	Drill/Shank Size	Twist Length	Overall Length
FX122-Bedlock	Right	19/64"	3-1/2"	6"

HIGH SPEED STRAIGHT SHANK BRAD POINT CENTER DRILL (FX122B)

For use with all types of adjustable counterbores and countersinks or for straight boring jobs. Two outlining spurs and brad point produce clean, accurate holes. Highspeed steel for extra tool life.

These drills can be used in portable electric drills or drill presses with chucks of 3/8" or more.

Brad point prevents "skating"... keeps the drill boring right where you want it to bore. With these wood drills you can even bore holes that overlap.

Two outlining spurs cut the outline of the hole ... help assure round, true holes every time. Spiral flutes lift chips up and out of the hole.

FORSTNER STYLE BITS (F809)

FOR DRILLING VERSATILITY - Forstner style bits are guided by the outside rim instead of by a point. The result is outstanding versatility in drilling operations. Forstner style bits are forged from special steel and heat treated for longer life. For use in drill presses or any portable drill with a 3/8" or larger chuck. All bits are 3-1/2" long.

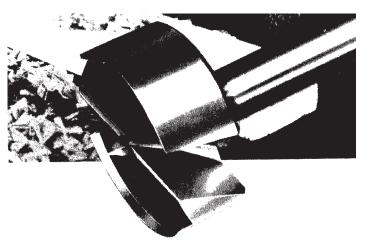

- Drill clean holes in thin stock and veneer
- Drill smooth flat bottomed holes ... even in end grain

- Drill at any angle... creating ovals or curved openings
- Drill off the edge

Shown are 16 and 7 piece sets.
